Rimu, Rafid Shariar	18-36685-1
Rahman, Mahjabin	19-36262-1

Art Sell-a web-based E-commerce website

Project Description:

This project is a representation of a platform to sell art, which is an E-commerce Website. The project contains some functionalities including crud operations like a normal E-commerce website can do. For example, here such as buyer can buy art, Artist can sell art, including a delivery guy who can deliver the arts to the buyers within a given time and an Admin to run the website operation. And its main mission is to support the art community of Bangladesh so that the artists can get their recognition in society and can earn their livelihood. Moreover, the upcoming generation can choose Art as a profession rather than a hobby so that the Art cultural of this country get secured.

Requirement Analysis:

User Category: This project contains 4 kinds of users who are different from one another regarding their roles. And they are:
- Admin (Who will be the core of this development mentation)
- Artist (Who's job will be showcasing his/her towards the people who will have the mindset of purchasing the art)
- Buyer (These kinds of people will be the audience who will have the willingness to purchase the art from the website)
- Delivery Guy (People who will deliver the arts to the people who purchased the art securely)

Tools Used: To develop this project, we have used the following:
- Visual Studio Code (Version: 1.57.1)
- PhpMyAdmin (database)
- XAMPP (v3.3.0)
- Dia (0.97.2)

Project Folder Structure:

	View ->	background
	Content	
	Control	
	File	
	files	
	jscontrollers	
	model	
	updateart->	updateartcontrol
		updateartmodel
		updateview- >background
Artsell->	updatecontrol	
	updatemodel	
	updateview ->	background
